DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Miller (4,813,235).

Miller discloses an open circuit hydrostatic transmission with a pump 10 an orifice 38 fluidly connected to the pump, and a two-position three-way logic valve 26 having a first and second position fluidly connected to the orifice 38

Allowable Subject Matter

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-9 are allowed. The improvement comprises a remote pressure compensation relief valve adapted to receive a load sensing signal fluidly connected to the orifice when the two-position three-way logic valve is in the first position and disconnected from the orifice when the two-position three-way logic valve is in the second position.
